## KEY STAGES 1 & 2

You are Major, an old war horse recovering from wounds you received in battle.

Your stable mate, Prince, is slightly lame so could not go to war.

His life at home on the farm has been very different to yours.

Take it in turns to be Prince and Major - think about their different tasks and experiences.

Remember that your farm in 1915 does not have a tractor and relies on horses for everything.

Horses leave a Dorset village to join the war in 1914

### FACT

8 million horses were killed on the Western Front in the First World War. A further 2.5 million were treated in Veterinary Hospitals.
